**Arista's New ATX-807 Mini ITX Form Factor Pentium 4™
Single Board Computer is Ideal for Industrial Applications**

***The new ATX-807 features 800MHz FSB Pentium 4 Prescott CPU and equipped with eight
USB 2.0 ports, dual Ethernet Ports***

FREMONT, CA – July 18, 2005 – Arista Corporation, a leading industrial computer solutions provider and system integrator today introduced its new ATX-807 Single Board Computer. The SBC is specifically designed for Industrial application and its Mini ITX Form Factor is ideal for compact chassis. The computer features a Pentium 4 Prescott (90nm) CPU with 400/533/800M FSB selectable speed and is Intel VRD 10.1 compliant to support future advanced processors.

The new ATX-807 CPU is comprised of Intel® Pentium® 4 processors with Hyper Threading Technology. Two DIMM sockets support up to 2GB DDR memory and dual Intel Ethernet controller are located on the board providing Gigabit and 10/100M speeds. LAN Led is built-in to the RJ45 connector displaying speed, link and activities. An external connector is available to display LAN status on the front Panel of the computer chassis. The SBC is equipped with support hardware monitor and watchdog timers that will alert administrators in the even of abnormal operation.

“The ATX-807 is compact and very fast on computing capabilities,” said Stewart Austin, director of sales for Arista Corporation. “Arista’s ATX-870 is ideal for industrial applications, providing dual Ethernet controllers and eight USB 2.0 ports.”

Pricing and Availability

Pricing for the ATX-807 starts at \$380 for North American sales and is available for immediate delivery. A datasheet for the ATX-807 is available at www.aristaipc.com. For sales information contact Arista at (510) 226-1800 or visit their Web site at <http://www.aristaipc.com>.

Editor's Note:
